

TOPLOADER

EASY BULK STORAGE HANDLING FOR BIOMASS

Flexible Various sizes from 50 - 300 m³
Capacity up to 30 m³ per hour

- Easy unloading by truck
- Easy dosage
- Economic solution

Rails are mounted above the bunker walls. A trolley travels along these rails. On this trolley there is a blade mounted.

This blade can move up and downwards. Every time the blade moves from the front to the back it takes an amount of soil and puts it in the collector behind the bunker. From there it can be transported to a biogas plant, incineration plant or to the Dorset dryer.

The stored materials remain easy accessible
